OBJECTIVE:

Results-driven AI Engineer, integrating a strong foundation in UX/UI design with specialized expertise in Machine Learning, Deep Learning, and NLP. Demonstrates a proven ability to solve complex problems by leveraging data science, evidenced by securing top rankings in national hackathons and presenting research at the NASSCOM Conference. Seeking to apply comprehensive skills in model development, system architecture, and full-stack project implementation to a challenging AI engineering role.

SKILLS:

- **Core Programming** - Python (Advanced), C, TypeScript
- **ML/DL Frameworks** - PyTorch / TensorFlow, scikit-learn
- **Data Science & Analytics** - Statistical Modeling
- **Specialized AI/NLP** - LangChain, Huggingface API
- **Engineering & MLOps** - GIT, Docker, SQL, Jupyter Notebooks
- **Cloud & Full-Stack** - AWS Cloud Essentials , React

WORK EXPERIENCE / QUALIFICATION:

Innovation & Research Lead

10/2024 – 12/2024

SFL | Chennai, India

- Directed Ideation/R&D, setting the technical roadmap and managing feature delivery.
- Managed the product development design phase, balancing cutting-edge technology integration with user-centric design principles.
- Directed visual design projects and developed innovative concept directions.

UI and UX Designer

06/2023 – 07/2023

[Arjun Vision Tech Solution](#) | Chennai, India

- Oversaw and implemented UI/UX designs for mobile/app content.
- Interpreted complex client requirements and created user-centric solutions.
- Conducted user research to inform design decisions.

AI/ML PROJECTS:

Taxonomist-Gidy – [\[GitHub Link\]](#)

- Designed and built a tax-policy simulation and GDP prediction platform using agent-based modeling linked to real-time economic indicators.
- Developed an interactive interface for scenario analysis and budget allocation using React/TypeScript integrated with a Python backend.

Health Query RAG – [\[Drive Link\]](#)

- Engineered a Retrieval-Augmented Generation (RAG) system to answer complex health-related queries from thousands of documents.
- Utilized OCR (Tesseract) for data extraction, followed by semantic chunking and reranking (using LangChain/Huggingface API) to ensure highly accurate and context-aware responses.

TrueFIR – [[GitHub Link](#)]

- Created a blockchain-powered FIR filing system optimized for minimal gas costs using Solidity and Polygon testnet.
- Integrated anomaly-detection logs to prevent misuse and enhance data integrity, demonstrating security-conscious system design.

CampaignIQ– [[GitHub Link](#)]

- Developed a marketing analytics platform to quantify campaign effectiveness using Python-based causal inference models.
- Engineered a full-stack application integrating a React/Vite frontend with a Python/Flask backend for data analysis and completely deployed end-to-end on LinuxOne

HACKATHONS & CONFERENCES:

Hackathon Achievements

- Gidy Techpreneur (1st Place): Built an ensemble-based GDP prediction model and a budget allocation system for the Indian government, demonstrating rapid prototyping and ML implementation.
- Fusion for Future (2nd Place): Developed a blockchain-powered FIR filing portal with integrated anomaly detection logs, focusing on low gas cost optimization for transparency.
- IBM Z Datathon 2025: Presented Campaign IQ, a solution focused on causal inference to determine the true cause of health campaign outcomes, moving beyond simple correlation analysis. This showcases advanced system design for generating actionable insights.

NASSCOM Conference

- Presented a research thesis on enhancing context awareness in Small Language Models (SLMs).
- The core focus involved developing optimization techniques, lightweight fine-tuning strategies, and a unique system architecture specifically engineered for robust domain adaptability in SLMs, following rigorous problem-solving and technical brainstorming sessions.

EDUCATION:

Bachelor's Degree in Artificial Intelligence and Data Science

March 2023 – March 2027

Saveetha Engineering College, Chennai, India
3rd year (5th sem)

CGPA – 9.2

CERTIFICATIONS & INTERESTS:

Certifications: [AWS Cloud Essentials](#), [NLP Certificates](#).

Interests: **UX Research** (applying human-centered design principles to AI interface development), Visual Storytelling (communicating complex AI findings effectively).
